

System- and Database-Administrator (f/m/d)

We are looking for a System- and Database-Administrator (f/m/d) to join our AddApptr Team. You diagnose and resolve problems quickly, automate where it makes sense, monitor what is needed and stay on top of things at all times. You are patient to communicate and helpful with a variety of interdisciplinary teams and users. Your goal is to ensure our infrastructure runs smoothly and efficiently.

Your Role:

- Server setup, configuration, maintenance and monitoring (Debian Linux)
- Software Deployment
- Ensuring security and efficiency of IT infrastructure
- Troubleshoot issues and outages
- Working closely alongside our software developers
- Be available, in turns, in the evenings and weekends in case of emergencies (as part of our on-call duty team)
- Setup and configuration of software, accounts and workstations

Your Background:

- Proven experience as a System Administrator, Database Administrator, or similar role
- Familiar with various operating systems and platforms including Debian Linux
- Familiar with virtualization tools (Docker)
- Database management (MySQL, column based databases)
- Knowledge and experience in the most common big data projects (Kafka, Redis, Hadoop, Druid, Elastic, ClickHouse etc.)
- Knowledge of system security (e.g. intrusion detection systems) and data backup/recovery
- Ability to create scripts in Bash, PHP and Python, Perl or other language
- Resourcefulness and problem-solving attitude
- Excellent communication skills in spoken and written English, preferably in German as well
- Experience with networks (WiFi, LAN, WAN) and patch management is a plus
- B.Sc./B.A. in Information Technology, Computer Science or a related field; professional certification is a plus
